Guide to Animal Feeding Operations

Water Protection Program fact sheet

3/2013

Laws passed by the General Assembly to protect water quality in Missouri designated the Missouri Department of Natural Resources as responsible for establishing rules, policies and guidelines. By establishing and enforcing standards and properly managing animal waste, we can protect our valuable water resources. Preventing contamination is the key to protecting water quality for all Missouri citizens. The following requirements regulate concentrated animal feeding operations. When an operation meets all state requirements the department is required to issue a permit to such operation.

Rules and Laws

Requirements for Class I concentrated animal feeding operations are contained in state legislation, HB1207, under Section 261.105 and 640.700-640.755 of RSMo, supp. 1996. This law became effective June 25, 1996. Rules were issued March 31, 1999 and revised Jan. 29, 2009 and April 30, 2012 under 10 CSR 20-6.300.
