	All Auxiliary wiring to be protected through a power fuse module located under hood. Fuse bus is energized with a solenoid that is energized with "KEY ON". All wire, switches, relays, and power fuse modules must be properly secured and mounted as per industry standards. All leads from this main power point are to be fused using ATO/ATC bus 12 circuits 30A/ 100A MAX fuse block with screw terminals for securing wires. All ring terminals & other circuit connections to be mechanically crimped using a ratcheting crimper to insure proper tension & 3:1 adhesive lined black heat shrink to cover crimp so to insure added protectionto connections. All circuits must have proper wiring gauge & circuit protection as recommended by equipment manufacturer.		
		GRAND TOTAL	$ 79,280.00

If you should have any questions, please don't hesitate to give me a call. Thank you!
